Resetting shot clocks to factory defaults

New clocks are factory set. To set the Receiver Code for replacement transmitters (version 2.X):

1) Press and hold "PROGRAM MODE" button
2) Apply power by plugging in power supply
3) Release "PROGRAM MODE" button when "1" appears
    - A "0" will alternate while the clock is learning the transmitter code
4) Press and hold red button on the transmitter until "1" appears again
5) Release the button on the transmitter to complete the learn process

The clock is now ready to use.

Please Note: Each clock must be set separately.
